Example above: If the first date in your horse's programme is 1 January, then your second injection must fall within the following dates in the next two columns (shown in red). Let's say the second jab was on 22 Jan, which is fine, you must then find that date in the first column again in order to find out when it is permitted to administer the first booster (third injection). In this case it must be given between the two dates shown in green. (If the date of your horse's first jab was on 3 Jan, then the second jab must be given between 24 Jan and 5 April. Third must be given between 23 Jun and 27 Aug).

Leap years would be ignored for an annual booster, but for the two primary injections and first booster injections, the days must be counted and therefore a leap year would interfere with the correct number of days between injections. Please take this into account when using the chart. Relevant leap years: 1996, 2000, 2004, 2008, 2012, 2016.
